

**REMARKS**

The foregoing amendments in the specification at pages 6, 7, and 9 change "longer" to "shorter" to correct clear errors. The specification, including, e.g., exemplary values for the "first" and "second" wavelengths of 655 nm and 785 nm, respectively, make it clear that what the application terms the "first" wavelength is the shorter of the two wavelengths.

The foregoing amendment in the specification at page 14 notes that the embodiment being discussed is shown in Fig. 1.

The foregoing amendments in all the claims and in the Abstract delete reference numbers to bring them closer to the standard U.S. practice. Applicants note that reference numbers in claims are not to be interpreted as limiting the claims, and these amendments are therefore only matters of form.

No new matter is introduced.

Entry of this Preliminary Amendment is respectfully solicited.

Dated: July 14, 2006

Respectfully submitted,

By
